

ASSESSING YOUR PREPAREDNESS TO MANAGE OMICRON IN THE WORKPLACE

			
We understand the new and different hazards and risks arising from the Omicron variant			
We have reviewed the risk profiles of our workforce and considered the impact Omicron may have on our controls			
We have a resourced, capable and empowered team, designated to manage our COVID activities and response			
We have clear and strong COVID management policies, including mandatory vaccination requirements			
Our existing COVIDSafe protocols are robust and are strongly adhered to across our workplace(s)			
Our COVIDSafe practices extend beyond our workplaces to keep our workers safe when working offsite			
We have effective methods to consult with our workforce (as required) about changes at the workplace			
We have effective methods to communicate COVID updates and changes with our workforce, clients, and community			
Our managers are equipped and supported assist us to manage current COVID risks and support workers			
We have resources to support our employees to keep safe and continue working (e.g. RATs, PPE, remote work, leave)
